

AI Networks

Iren 2027- Benavent

t-SNE-2D - Communities with Voronoi regions (experiment)

Github : clone it don't fork it

BenaventC/AInetworks

Best : A VS code + Github copilot working environment

(Process :
database -> extraction -> Py notebook -> latex -> rewriting ->
publishing)

Some topic ideas

1. Law and administration
 - a. Law Tech
 - b. Contract tech
 - c. tenders (appeld'offre)
 - d. Real estate
2. Life and health
 - a. Health tech
 - b. Med tech
 - c. Pharmatech
 - d. Biotech
 - e. agrotech
3. Bots
 - a. Robotics arms
 - b. Robotics android
 - c. Drone
 - d. Physical AI
4. Mobility
 - a. Spatial tech and climate
 - b. Autonomous Vehicule
 - c. City traffic
 - d. maritime transportation
5. Marketing tech
 - a. geo
 - b. consumer twins
 - c. Knowledge marketing management
 - d. CRM and aftersales
 - e. Business intelligence
6. Creatives industries
 - a. Music
 - b. Videos and movies
 - c. Publishing
7. Management
 - a. Hrm Tech
 - b. Consulting
 - c. Audit
 - d. Creativity and innovation
8. Industries
 - a. Supply chain
 - b. Production
 - c. Environnement monitoring
 - d. Defense

Method

Mistral Agent

Search the web for information about one or more companies. The required information includes:

1. Founding date
2. Country
3. Headquarters city
4. History
5. Value proposition
6. Business model
7. Market capitalization
8. Funds raised
9. Revenue
10. Profit
11. Main investors
12. Main competitors
13. Main partners

Store the collected information in a **CSV file**, with one column per field and one row per company.

The Mission:

- Identify and precisely document **30 to 40 key players** in the chosen market, **excluding major actors** (market cap > \$500 billion) and **startups**.
- The CSV file must be **manually corrected**, without AI assistance, to align with the database standards and ensure factual accuracy.
- It should be **emailed to Christophe.benavent@dauphine.psl.edu** in ***.csv format**.
- The CSV files will then be **incorporated into the database** with the help of the **GitHub Copilot agent**.

Your job

- Once the database has been enriched, **select the relevant companies** for your analysis.
- Analyze the **competitive structure**, investment patterns, and strategic alliances within your market. A **quantitative approach** is strongly encouraged to support your findings.
- Finally, **write a 5-page LaTeX research note** that critically examines the competitive dynamics of your market, and a few graphical illustrations. A few of good references are welcomed. In a scientific manner.
- The writing must be **human**, even AI polished syntax but not style, ideas and expression.
